Scoreboards - Video screens - Control software

Stramatel, the European specialists of electronic scoreboards

Created in 1981 by Claude Roul, the company of Stramatel has established itself as a recognisable name within the electronic scoreboard industry. For more than 35 years, Stramatel products have been made from the most technologically advanced products, such as 2nd generation LED lighting, ultra-sensitive lighting, remote controlled consoles...

With a world-renowned presence in more than 80 countries, Stramatel has already produced several hundreds of stadium specific scoreboards. The company is proud of its reliability and capacity to respond to the demands of its consumers to the best of its ability.

Stramatel designs and fully assembles its products at the headquarters, located in Le Cellier, France. In order to have a greater accessibility to our clients, we also have offices based in the Paris region and another in the Rhône-Alpes. The company has kept its family values whilst implementing its design ideas, production and services-based quality (ISO 9001) and respect for the environment (ISO 14001).

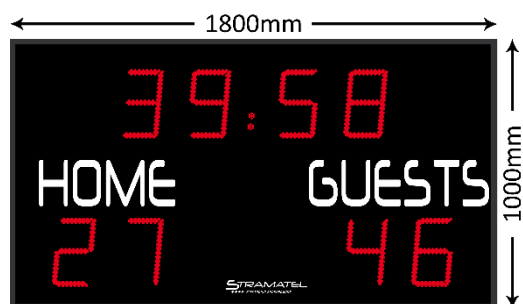

For Football and Rugby

STRAMATEL recommend :

Stramatel offers scoreboards that meet the highest levels of certification whilst also being easy to use.

Together, our range of stadium scoreboards are specially designed to withstand weather damage submitted under various temperatures.

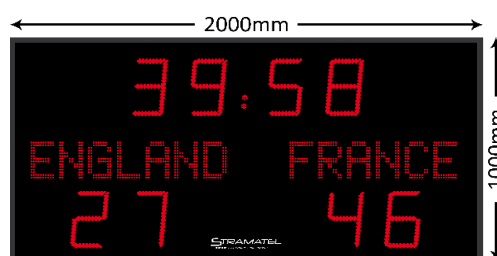

FRB Scoreboard

This scoreboard allows 110m of visibility with the possibility of displaying both game time and scores. Adapted for use at a department to national level, with the option to personalise the name of your club instead of the standard 'Home'.

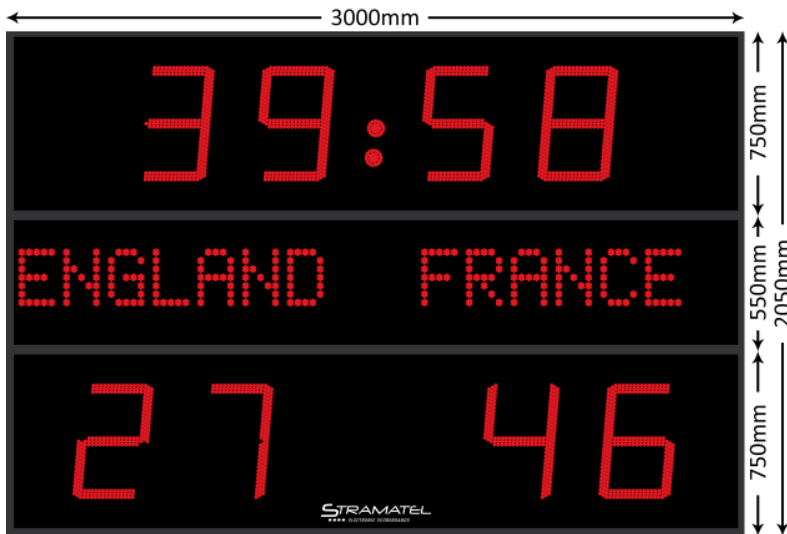

FRB AD Scoreboard

This scoreboard allows 110m of visibility with the possibility of displaying both game time and scores in addition to team names display as well as scrolling messages of up to 1,000 characters.v

High level stadium scoreboard :

FRC AD scoreboard

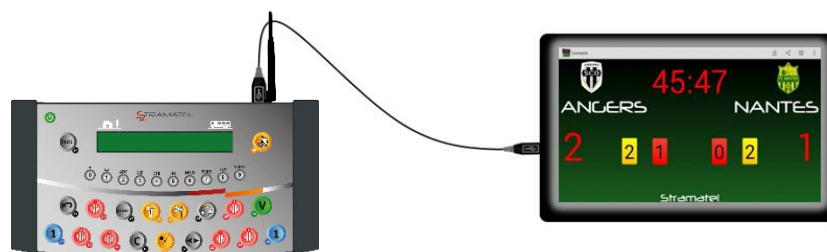

This scoreboard allows 200m of visibility. Meeting national and international federation requirements with the possibility of displaying both game time and scores in addition to **team names display** as well as scrolling messages of up to 1,000 characters.

To control your scoring display :

Stramatel's objective is to create a scoreboard with the **easiest management features** possible through our intuitive control panel. Each sport has a specific programme with memorising and pre-selection of parameters. The **Stramatel Android APP** is freely available in order to operate via touchscreen controls.

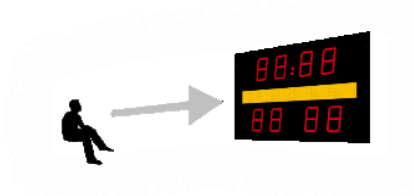

Enjoy 200m of radio range and 16 hours of battery life.

To enhance your scoreboard :

Alpha digital option:

Personalise your scoreboard to the finest details by being able to input team names and add scrolling messages.

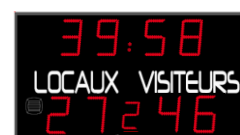

Choice of dimensions:

Choose the size of your scoreboard digits to match the sight distance of your sports field.

Field hockey adaptation :

Add a central digit to your scoreboard to display the period and a buzzer to match the expectations for Field Hockey.

Optional with your score display :

SL Live stream box:

Broadcast your matches live on Facebook live and other social networks with the integration of scores. Film from your smartphone and share your scores like a pro.

Mobility with outdoor trolley and battery:

You do not want to connect the electricity to your scoreboard or just keep mobility, then opt for a scoreboard on the mobile wheeled stand option on mains or battery.

Advertising panels option:

To dress up your scoreboard and display your partners as closely as possible to the scores, ask Stramatel to add personalized or neutral sheets that you can customize yourself.

Outdoor video screens to :

- ✓ Increase fan experience.
- ✓ Create an additional source of income by promoting partners through sponsorship.
- ✓ Standard or custom screens to best meet everyone's needs.

Mars video screen

Allows you to easily display scores, automatic match animations and advertising or communication images / GIFs.

Custom-made video screens

Custom-made video screens are very effective in stadiums in order to broadcast scores, video animations and highlight club partners and stream any other desired video content. They can be installed on post, I-beams or on specific structures. Our screens are designed to be permanently set up outside.

LED video banner

Very efficient in order to display the regulatory score elements while broadcasting game animations and advertising right next to it. Our screens are scalable over time.

LED perimeter

The closest to the game, LED perimeter screens are highly valuable space for displaying adverts. Thanks to our SL video system, the LED perimeters can even display the scores.

Video control room for your tailor-made video screens

SL Video System

Computer system designed by Stramatel allowing on the one hand the transfer of information from the control panel as well as the creation and management of media playlists (images, videos, etc.) in order to display them on video display.

Official templates included

Official templates approved by the main federations are supplied. Alternatively, create your own in advance from the software and mix your different creations to fit your desired format.

Adapted video control system

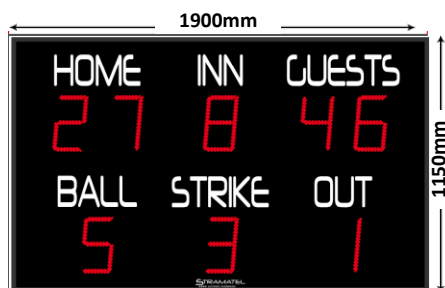

The SL Video System is supplied with additional control elements to match the desired use of the screens. It can be very light and easy to use or very complete to suit larger sporting events.

Control by tablet

Control the video screen with complete freedom by managing the SL video system software remotely with the SL Remote touch pad.

Other outdoor sports :
